Atlantic Engineering Consultants Limited offers a multi-displinary range of consulting services in the areas of Municipal, Civil, Structural, Electrical, Mechanical and Environmental design, contract administration and project management including procurement and construction supervision. Services encompass the total project from initial concepts, feasibility and economic studies to the design and final construction stage.

Atlantic Engineering Consultants Limited's team of experienced professionals and support staff can capably handle a broad range of construction projects. Building services include the design of varying building types including residential, commercial, institutional and industrial. Civil services offered include Municipal Engineering such as subdivision design, water supply and distrubtion systems, sewage disposal and treatment systems, runoff and flood control, highway and road design, bridges, drainage structures and marine projects such as wharves, breakwaters, retaining stuctures, docking facilities, cargo terminals and passenger terminals. Heavy Civil services offered include Engineering, Procurement and Construction supervision for the Pulp and Paper, Mining and Manufactuing Inudstries along with service to the Offshore Oil Industry. Also included are transportation structures such as highways, bridges and culverts, underpasses and overpasses, retainig stuctures and drainage structures. Electrical services offered include building electrical systems, transmission and distrubtion systems, fire alarm, lighting and emergency power systems, along with control and energy managment systems. Mechanical capabilites include heating, ventilation, air conditioning, plumbing and fire protection systems for residential, commerical, institutional and industrial projects. Environmental services include environmental assessments and impact statements, studies, monitoring programs, etc.

PROFESSIONAL SERVICES

Bowringer Engineering Limited is a mechanical contracting company specializing in industrial mechanical project work at the major industrial manufacturing plans throughout the province, specifically in the Oil and Gas, Pulp and Paper, Chemical, Mining and Utility industries.

Bowringer provides the following contract services to the industrial sector:
- design, fabrication and installation of pressure vessels and pressure piping, both carbon and stainless steels
- installation and maintence of mechanical machinery and systems
- installation and maintence of power boilers
- fabrication and installation of oil and propane piping
- design, fabrication and erection of API 620 and 650 Oil Storage Tanks, ULC Storage Tanks, AWWA D100-84 Storage Tanks, tank repairs to API 653, penstocks
- supply, installation and repair of refractory materials
- design, fabrication and erection of structural and miscellanous steels

Bowringer Engineering Limited is registered with the Association of Professional Engineers and Geoscientists of Newfoundland (APEGN) and is certified with the Provincial Department of Government Services to complete work in accordance with the standards of the American Society of Mechanical Engineers (ASME) and the Boiler and Pressure Act of Newfoundland and Labrador. The compnay has a division 2.1 Certification with the Canadian Welding Bureau.

Over the past twenty years the owners of Bowringer have successfully tendered and completed a substantial number of demanding and complex maintenace and monderization projects throughout the province. The company provides the industrial sector with a highly qualified and experienced team of engineers, supervisors and trades personnel at very competitive rates.

PROFESSIONAL SERVICES

David Burt & Associates Ltd. is a structural/civil engineering firm offering expertise and experience in a wide range of structural and civil engineering projects.

Structural Engineeering projects include:

- Multi-story steel and concrete structures
- Large span industrial structures with heavy cranes.
- Masonry structures
- Heavy timber structures
- Failure investigations

Civil Engineering projects include:

- Site services - parking lots
- Concrete box and arch culverts
- Small bridges
- Marine Structures

Engineering services provided range from preliminary studies and assessments, pre-design, design, contract documents, tender call, contract administration and inspection services.

PROFESSIONAL SERVICES

EDM Consultants Limited is the regional practice of the EDM Group of Companies. THe company was founded in 1981 by the owner, Bradford Chaulk, for the purpose of providing consulting engineering services in the Province of Newfoundland and Labrador. The forerunner of the firm was Chaulk's Construction Limited, a family business started in 1946.

EDM Consultants Limited is the key civil engineering arm of the group, providing engineering services in both the domestic & international market.

EDM provides specialized engineering technology in water resource development, treatment and distribution and wastewater collection and disposal. Solutions are found by finding balance between economic constraints, social objectives and protecting our environment.

Our transportation division offers a range of services from airport civil works, highways/roads, including studies, detailed design, and construction supervision.

Specialty:
- Water & Sanitation: Municipal Water Supplies, Municipal Sewage Collection Systems, Water & Waste Water Treatment, Related Environmental Considerations
- Transportation: Highway/Roads, Airport Civil Works, Bridges
- Industrial
- Civil
- Architectural
- Structural
- Mechanical
- Electrical

EDM's philosophy is to provide our clients with the best in professional engineering services by focusing on a range of specialized services. This has enabled the firm to utilize the latest in tecnological advances and innovative techniques. Our senior personnel are responsible for each assignment with hands-on involvement in all phases of work. Our efforts are directed towards meeting committed schedules, delivery of high standard in professionalism, and a quality product.

FGA Consulting Engineers Limited is a wholly owned and operated Newfoundland firm established in 1983, providing multi-disciplinary engineering consulting services in the areas of:

- Structural Engineering
- Welding Engineering
- Civil Engineering
- Mechanical Engineering
- Quality Assurance & Quality Control Services
- Prime Consulting Services
- Non-Destructive Examination/Materials Engineering
- Forensic Engineering
- Environmental Engineering

Originally formed to provide specialized consulting engineering services in the fields of structural design and welding engineering, it has expanded around these two specialities to meet the specific needs of its customers and the Newfoundland industrial marketplace.

Through a joint venture agreement with QUASAR, the company offers ISO 9000 services in Newfoundland.

In 1991, FGA entered into a joint venture agreement with CANSPEC Group Inc. to provide consistent competent and conscientious service by a team of engineers and inspection specialists dedicated to providing integrity, quality service and professionalism in the field of non destructive examination.

FGA has been aggressively purusing international markets and has completed work in Bermuda, has formed a joint venture partner with CIMEX, Mexico City and is pursuing business opportunities in Argentia and Chile.

Fracflow Consultants Inc. (Fracflow) is a 100% Canadian owned and operated company that was founded in 1981 to provide specialized consulting services in hydrogeology and geological engineering. Since that time, Fracflow has grown and now offers a wide range of services in: Hydrogeology and Surface Water Hydrology; Environmental Assessment and Remediation; Contaminant Hydrogeology; Geological Engineering and Rock Mechanics; Geotechnical Engineering and Soil Mechanics; Environmental Impact Assessment. The services provided by Fracflow range from simple analysis based on our collective experience and judgement to state-of-the art field studies and numerical modelling. We are a group of professional engineers and geoscientists committed to using the most appropriate level and methods of investigation and analysis for a given problem, taking into account both technical and economical considerations. Fracflow has conducted a number of multi-component and multidisciplinary projects.Where necessary, Fracflow augments a project team with specialists or establishes joint ventures with other firms, as needed, for specific projects. This arrangement ensures that the personnel assigned to each project have the qualifications and experience necessary to meet project needs, using local expertise wherever possible. Our clients include government and research organizations as well as companies in the mining, construction, consulting, and petroleum sectors. Activities range from overall project management to specialized rock, soil, and water testing services.

PROFESSIONAL SERVICES

Mineral Exploration, Environmental and Geotechnical - Geoscott designs, performs and interprets surveys in many exploration, engineering and contaminant situations. Techniques include ground probing radar, shallow refraction seismic, electromagnetic (EM), conductivity mapping, precision magnetic surveys and high-resolution, near-surface seismic reflection mapping. Applications include mapping bedrock depth, finding buried utilities, structures and cavities, and appraising sources for granular materials.

Geoscott can design an entire mineral exploration programme, complete the field work, and interpret the results. Field work includes prospecting, geologic mapping, geophysical and geochemical surveys, and diamond drilling management. In geophysics, Geoscott offers IP (gradient, multi-dipole, down-hole), seismic, horizontal loop, EM(MaxMin), time-domain EM (pulse EM) and gravity, as well as combined magnetic/VLF surveys. We provide a high level of interpretation, integrating all field results. To support geophysical interpretation, we can provide 2D computer modelling of airborne, ground EM and IP survey results.

Petroleum exploration - Geoscott provides services in land seismic permitting and acquisition. We utilize an ARIES system to record either truck-mounted or heliportable-based land seismic programs. Transition zone surveys from land to water can also be carried out.

Gravity surveys employ a Scintrex CG5 gravimeter, with elevation control mapped with a Trimble 4000 series real-time differential GPS.

- Marine pipelines
- Marine risers and mooring systems
- Artic pipes
- Process engineering
- Offshore structures
- Naval architecture
- Subsea production systems
- Other offshore related services

IMVPA offers a complete range of multi-discipline Project Management, Engineering, Procurement and Construction Management services to our domestic and international clients

InCoreTec Inc. is a provately owned engineering firm consisting of a world class team providing a wide range of professional consulting services in Marine Engineering and Information Technology. InCoreTec's products feature the Ship Predictor System (SPS) and the Advanced Ship Autopilot System (ASAS), marine navigational tools, and the Intelligent Friction Compensator (IFC), an innovative product for robotics. The company's services fall in the following areas:

- Information Technology: Design and Development of special software systems, and neural networks and Database Management Systems.

- Environmental Engineering: Oil spill Modelling, and Iceberg & Sea Ice management, statistics and forecasting.

- Offshore Engineering: Analysis and design of Offshore Structures, Marine Hydrodynamics, and motion prediction of floating bodies.

- Other services range from preliminary studies and design to product development and Project Management.

Kavanagh & Associates Limited (KAL) is a privately owned company licensed to practice engineering in the Province of Newfoundland and Labrador. Expertise is primarily in the civil engineering discipline, particularly heavy civil engineering projects. KAL is also experienced in environmental site assessments, investigation of contaminated sites with both hazardous and non-hazardous material and site remediation.

The KAL engineering team has more than 25 years experience in the design and construction supervision of:

- Water supply systems
- Potable and wastewater pumphouses
- Water treatment plants
- Water storage reservoirs
- Storm sewerage systems
- Sanitary sewerage systems
- Residential, industrial and commercial land development
- Storm and sanitary sewerage systems
- Buildings
- Highway construction and urban street rehabilitation

In addition KAL has conducted comprehensive engineering studies for long range planning of water supply, sanitary and storm sewerage systems. KAL is registered to ISO 9001:2000 standard.

H.T. Kendall & Associates Limited is a Newfoundland engineering consulting firm specializing in the provision of innovative solutions for a broad range of municipal infrastructure projects. Projects successfully completed by this firm include the following disciplines:

Municipal infrastructure projects, involving water, sanitary and storm sewer design and construction projects
Complete residential land development
Recreational open space design, recreation facility design and rehabilitation
Municipal solid waste disposal system design and evaluation
Municipal infrastructure assessment and evaluation studies
Underground pipe location
Flow monitoring, leak detection
Computer simulation of water and sanitary sewer systems
Tourism and marketing studies
Environmental assessment audits
Water quality assessments
Treatment plant operational assessments
Underwater engineering inspections
Environmental site asessments, Phase I & Phase II

A full range of services are provided from advisory to post construction commissioning, including feasibility studies, preliminary and detailed design, contract administration, on-site supervision, tendering and commissioning.

PROFESSIONAL SERVICES

Oceanic Consulting Corporation is an engineering firm specializing in performance evaluation of naval architectural and ocean engineering systems.

An alliance venture between the private sector, National Research Council of Canada, and Memorial University of Newfoundland, the firm is a commercial front door to one of the world's most comprehensive collections of ocean engineering facilities.

Our people have an extensive background in performance assessments of ships, offshore structures, small craft, survival equipment and other marine systems in a range of severe conditions from arctic environments to extreme seas. This combination of facilities and expertise enables Oceanic to cost effectively provide our clients with timely, world class results.

Pan Maritime Energy Services brings together the strengths of RDS Engineering Ltd. and MNC Group Inc.

Pan Maritime offers a team of highly qualified professionals and technologists to provide project management and engineering support services. The team has depth and breadth of knowledge to not only deliver to the industry's immediate needs but also provide specialty services suitable for long term operations support in the following areas:

Marine & Offshore: Naval Architecture, Supply Chain Management, Logistic Support, Marine Engineering
Quality Management: ISO 9000, Quality Control Inspection, Vendor Surveillance & Auditing
Environmental Management: ISO 14000, Assessment/Audits, Emergency Response Plans
Health & Safety & Industrial Hygiene: Loss Management, Risk & Safety Analysis, Safety Management Systems/Safety Cases, Occupational Health and HACCP Program Development

Business Management: Strategic Development, Team Building
Training: Certified ISO 9000, ISO 14000, Quality Management Tools
Other Corporate Interests:
- Pan Maritime Production Services Inc.
- Canada's first FPSO contractor
- EDGE status
- Pan Maritime Drilling Inc.
- Atlantic Canada;s first drilling company
- EDGE status

Technip Offshore Canada Limited (TOCL), the Canadian division of Technip's Offshore Division, is based in St. John's, Newfoundland.

The company's involvement in the oil industry offshore Atlantic Canada now spans over eleven years, and it continues to build on its commitment and experience in the region. The merger of Technip and Coflexip in October 2001 brings one of the most integrated groups providing engineering, technologies and construction services to the oil/gas and petrochemical industry worldwide. With over 40 years of experience in the design and construction of large industrial fac ilities, a wide range of state-of-the-art technologies and operational bases spread over the 5 continents, the Group is able to manage all aspects of major projects at optimized costs, from front end engineering design to turnkey delivery.

With a workforce of 19,000 people worldwide, and annual revenues of about 4.5 billion euros, Technip ranks among the biggest full-service engineering and construction groups in the field of hydrocarbons and petrochemicals.
